Thanks Karen for the option. Let's see what and when RD sends around the new slides. I don't think we need to revise any of our slides at this point. I want to see the revised HED slide and the Options slides that RD is pulling together.

I can set something quick on the calendar to revise the slides together and make changes on Sharepoint if the team would like me to.

OK and fine with me.
Thanks much.

Subject: aldicarb meeting

Hi,

I put a meeting invite for 9:30 tomorrow with Jan so we can go over our slides and if she has any questions. At this point, Steve will be the presenter of both the drinking water slides and the eco slides and we will be there for support for questions. For the DW slides, while we presented EDWCs, I was thinking that the point is not to infer that those are the numbers HED used since we ended up giving them the distribution but rather to illustrate what a change in incorporation depth or pH can have on the EDWCs. I am interested in the revised HED slide as I admit I found that slide a little confusing for me when they were discussing the aPAD and GW vs SW influence.

So once Debra in RD sends out the revised slides we need to review quickly to see if we have any issues.

Does the team have any questions right now on process, clarification, or otherwise?

Thanks,
Amy
